Quality Custom-Made

DYE-SUBLIMATION Using Polyester Fabric

What is Dye-Sublimation?

Dye-sublimation is a printing technology which dyes polyester fabric by releasing heat-activated gases which bond with the fibers, resulting in a brilliant finish with photographic quality which is also weather resistant and washer safe.

How is it accomplished?

The dye-sublimation process involves printing a digital file on a special paper, using our large format Roland printers, and then heat-pressing the images to fabric using a large format rotary heat press.

What is the result?

REMARKABLY BRILLIANT

Full-process color printed
flags and banners

Flags and Banners can be made single-side, double-side, or single-reverse. Unlike screen printing, dye-sublimation prints do not incur additional cost for multiple colors. Cost is figured by the area printed, figured in square feet, percentage of coverage, and whether single-side, double-side, or single-reverse.
Advantages to dye-sublimation: Fabric color retention, color brilliance, digital format, cost effectiveness regarding quantity.
